Storage Tips

- Store berries in the refrigerator, unwashed, until ready to consume.
- Remove rotten or moldy berries to prevent other berries from becoming damaged.
- Blueberries can last up to a week in the fridge, while strawberries and raspberries are more fragile and last 2-3 days.

To freeze:
- Freezing berries whole retains their highest nutritional value. Remove overripe or moldy berries, wash, then drain. Lay a single layer of berries on a baking sheet, and freeze overnight. Store the berries in labeled, freezer grade bags; you can pre-portion the berries for specific recipes.
