Indigenous Terms

Glossary

Note

We provide this resource for general orientation to Indigenous terms, concepts, and cultural identities found within these HOM resources. However, communication of Indigenous identity and affiliation is complicated by settler colonialism and often clouded over by European interpretations of the social and geographical relationships of Indigneous peoples.

Spellings and pronunciations of Indigenous words vary as a result of cultural and geographical diversity, as well as their transcription into European writing conventions. This glossary of terms does not attempt to capture the full diversity and expression of the corresponding Indigenous cultures, but serves as a tool for continual learning.

Terms and Definitions

- **Abenaki** [a-BEN-a-kee] -- Indigenous tribe that is part of a larger group of Indigenous people who called themselves **Wabanahkik** [wah-bah-NAH-keek], translating to "people of the dawnland".
